Material Safety Data Sheet Chain Oil 100

Last Revision Date: March 2013

1. Identification of the Substance/Pre	paration and the Company/Undertaking
Substance or Preparation Trade Name:	Chain Oil 100
Unique Reference Number(s):	
Company/Undertaking Name &	Handy Distribution,
Address	Murdock Road,
	Dorcan Industrial Estate,
	Swindon,
	Wiltshire,
	SN3 5HY
Telephone Number:	+44(0)1793 333212
Emergency Telephone No.	As above
2. Composition	
Description:	A blend of highly refined mineral oils
CAS No:	Not applicable (mixture)
Hazardous Components	No component is present at sufficient concentration to
	require a hazardous classification for health in
	accordance with EC legislation.
3. Hazards Identification	
Health:	When used in the application for which it is designed this
	substance presents no major hazard to health. For
	toxicological information refer to Section 11.
Environmental:	This substance presents no major hazard to the
	environment. For Ecological Information please refer to
	Section 12.
Pressure Injection:	Pressure injection of all products will cause severe
	internal damage if not promptly treated.
4. First Aid Measures	Remove the affected person to fresh air. If recovery is not
	ranid obtain medical attention
Skin Contact:	Wash the affected parts of the body with soan and water
Skin Contact.	Change contaminated clothing. Dry clean and launder
	before re use. No emergency measures are necessary but
	if adverse skip effects follow refer for medical attention
Ingestion	Do not induce vomiting. Wash out mouth with water and
Ingestion.	seek immediate medical attention. Drinking water may
	be beneficial. Treat symptomatically
Eve Contact.	Flush eves immediately with fresh water for at least 15
Eye Contact.	minutes while holding the evelids open. No emergency
	measures are necessary but if adverse eve affects follow
	refer for medical attention
Pressure Injection.	Obtain immediate medical attention even though the
r ressure injection.	initry may appear minor
	injury may appear minor.

5. Fire Fighting Measures	
Flash Point: Extinguishing Media: Specific Exposure Hazards: Specific Protective Equipment for Fire Fighters: Explosion Data:	Typical 220°C (COC) Foam, Dry Chemical, Carbon Dioxide, Water Mist Combustion can produce carbon monoxide, carbon dioxide, water vapour, unburnt hydrocarbons, partially oxidised organic compounds and unidentified inorganic compounds, some of which may be toxic. Use self-contained breathing equipment when fighting fire in confined spaces. Material floats on water. Water may be used to cool containers exposed to fire. Material does not have explosive properties
6. Accidental Release Measures	
Personal Precautions:	Surfaces may become slippery after spillage.
Environmental Precautions: Spillage Procedure: Absorbent Materials: Disposal of Spillage:	 Water may be used to flush spills away from sources of ignition. Do not allow the product to enter public drainage system or open water courses. Bund using absorbent granules, sand, earth or proprietary equipment. Reclaim liquid directly or soak in an absorbent medium and transfer to a suitable marked container. Personal Protective Equipment (PPE) must be worn (see Section 8). Ventilate area and prevent entry into sewers and waterways. Collect free liquid for recycling or disposal Residual material can be collected using absorbent material. Sand, active clay or absorbent sheeting. By incineration or via authorised / licensed waste disposal contractor. Disposal must be in accordance with local regulations and current national legalisation.
7. Handling and Storage	
Handling: Storage:	Avoid contact with the eyes – wear chemical protective goggles when handling the product. Protective clothing such as impervious gloves should be worn if skin contact is anticipated. Protective clothing should be regularly inspected and maintained. The use of barrier and after work creams may be beneficial. Store under cover in a cool and dry location. Avoid exposure to high heat and sources of ignition.
8. Exposure Controls / Personal Prote	ection
Exposure Limits:	None
Ventilation Procedures:	Use with adequate ventilation.
Eye Protection: Skin Protection:	Chemical resistant goggles should be worn when handling, or where any risk of splashing is likely. Where prolonged or repeated contact is unavoidable wear impartious clauses when handling the resolute. The use
	of appropriate barrier and after work creams may be beneficial and gloves should be considered whenever their use is practicable and safe. Change heavily contaminated clothing and overalls as soon as possible.

9. Physical and Chemical Properties	
Physical State:	Liquid
Colour:	Pale Amber to Light Brown
Relative Density:	0.870 – 0.890 g/ml at 15°C
Initial Boiling Point:	> 280°C estimated
Viscosity:	Typical, 100 cSt at 40°C
Pour Point:	Typical, -10°C
Flash Point:	> 240°C, (ASTM D92, COC)
10. Stability and Reactivity	
Stability:	Material is stable at moderately elevated temperatures and pressures. May react with strong oxidising agents, especially at high temperatures.
Conditions to Avoid:	Avoid extreme temperatures, Preferably store between 5°C to 39°C
Materials to Avoid:	Strong oxidising agents (e.g. chlorates, peroxides)
Decomposition Products:	Hazardous decomposition products are not formed when stored under normal conditions. Incomplete combustion or thermal decomposition may generate such materials as: particulate matter and unburnt hydrocarbons; oxides of carbon; water; partially oxidized organic compounds.

11. Toxicological Information

This material is characterised as non-toxic because it shows the following characteristics (*based on data from components and similar products):

Eye Irritation:	Unlikely to cause more than transient stinging or reddening if accidental eye contact occurs.
Skin Irritation:	Not expected to be a primary skin irritant*. Prolonged or repeated skin contact may lead to dermatitis.
Respiratory Irritation:	Prolonged exposure to oil mists / vapours may cause irritation of mucous membranes and the upper respiratory tract.*.
Dermal Toxicity:	LD50 > 2000 mg/kg* (rabbits)
Inhalation Toxicity:	No data to suggest product is hazardous in this area
Oral Toxicity:	LD50 > 5000 mg/kg* (rabbits)
Dermal Sensitization:	No data available to indicate product or components may be a skin sensitizer
Inhalation Sensitization:	No data available to indicate product or components may be respiratory sensitizers
Chronic Toxicity:	No data available to indicate product or components present at greater than 1.0% are chronic health hazards
Carcinogenicity:	No data available to indicate product or components present at greater than 0.1% may present a carcinogenic hazard
Reproductive Toxicity:	No data available to indicate product or components present at greater than 0.1% may cause reproductive toxicity
Teratogenicity:	No data available to indicate product or components present at greater than 0.1% may cause birth defects
Other:	No other health hazards known Contains mineral oil. Under working conditions which may generate mists observe the US OSHA PEL of 5 mg.m ⁻³ and ACGIH STEL of 10 mg.m ⁻³

12. Ecological Information

Environmental Fate: Because of its low density this material floats on water. Since it consists of relatively low molecular weight paraffinic substances, small spillages into water will be dispersed by evaporation and/or biodegradation.

Aquatic Toxicity (fish):	LC50 >400,000 ppm in 96 h
	– Rainbow Trout (0% mortality)
Aquatic Toxicity (algae):	not established.
Aquatic Toxicity (invertebrate):	LC50 > 500,000 ppm in 96 h
	– Mysidopsis bahia
Mobility:	This material will float on water. For other Physio-chemical properties see Section 9.
Biodegradation:	Inherently Biodegradable
	(OECD 301B 50% in 28 days)
Bioaccumulation Potential:	Bioaccumulation is unlikely due to the very low water solubility of this product. Bioavailability to aquatic organisms is minimal.
Other Ecological Information:	Although not toxic to vertebrates and invertebrates, spilled material may affect organisms (especially small invertebrates) by physical smothering leading to or by deoxygenation of the water below the oil film.
13. Disposal Considerations	
Waste Disposal:	All means of disposal should comply with local and national regulations. Dispose of product and containers carefully and responsibly. Do not allow product to contaminate ponds, water courses, soil or drains. Do not dispose in drains.

14. Transport Information

This material is not classified as dangerous for transport under current EC and International legislation.

UN No: RID/ADR: IMO: IATA/ICAO: Marine Pollution Category Not classified. Not classified. Not classified. Not classified. Marpol 73/78 Annex I

15. Regulatory Information

EC Dangerous Substances / Preparations Classification: Risk Phrases: Safety Phrases: This material is not classified as dangerous for supply under current EC legislation None None

16. Other Information

DISCLAIMER:

The information and recommendations contained herein are accurate and reliable to the best knowledge and belief of Euro Oils Limited as of the date issued, but are offered without guarantee or warranty. They relate to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Conditions of use of the material are under the control of the user. Therefore, it is the user's responsibility to satisfy themselves as to the suitability and completeness of such information for their own particular use.
